1 PVC-kilel on kahekihiline struktuur: toonitud või põhivärvi aluskile ja läbipaistev PMMA-st pealiskiht, mis kaitseb värvi ja dekoore UV-kiirguse ja muude ilmastikumõjude eest.

2 REHAU lamineerimisdekoorid eeltöödeldakse liimiga ja kantakse spetsiaalse protsessi abil õrnalt aknaprofiilile. Sel viisil tagatakse kindel ja püsiv tulemus.

Lisaks personaalsele värvikujundusele on võimalik valida paljude erinevate aknavormide vahel.
