Enhancing lives**

KALEIDO FOIL

Standard decorative designs for REHAU
window and door profiles.

Windows. Reinvented for modern life.

Create an impact with wood, metallic and plain decorative designs

100% REHAU quality – definitely the right decision

New windows and doors are an investment for the future, which is why we're offering you the best quality, no matter what colour you choose. All foils are thoroughly analysed and subjected to long-term tests and exposed to the highest stresses. We only assign the REHAU quality label once all the tests have been passed.

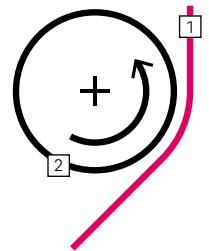

KALEIDO FOIL – for a truly customized look

KALEIDO FOIL expands your window design options with attractive choices. Whether you want the decorative designs inside or outside, you'll enjoy them for many years to come.

- Low-maintenance surface
- Innovative design and on-trend colours
- Weatherproof and UV-stable

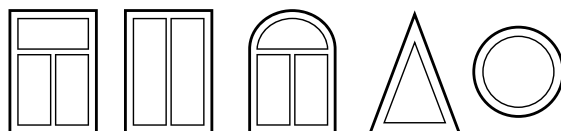

1 The PVC foil has a two-layer structure. The base layer is solid-coloured or printed, while the transparent top PMMA layer protects colours and decorative designs from fading due to UV radiation or other weather influences.

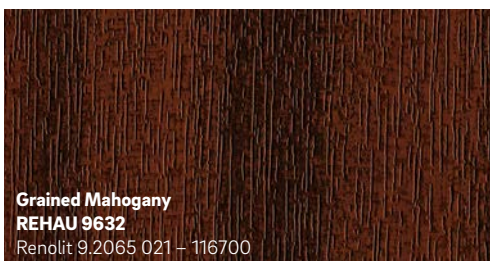

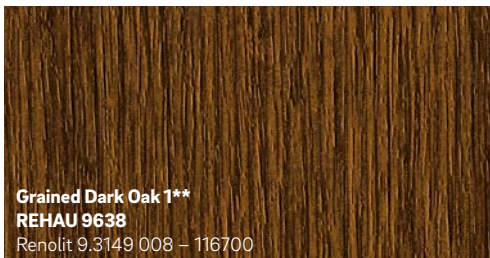

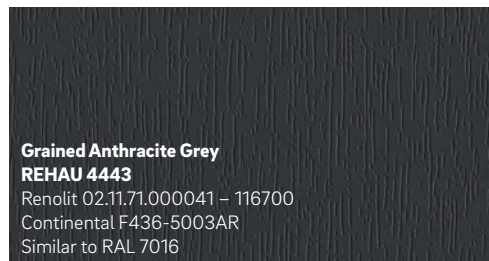

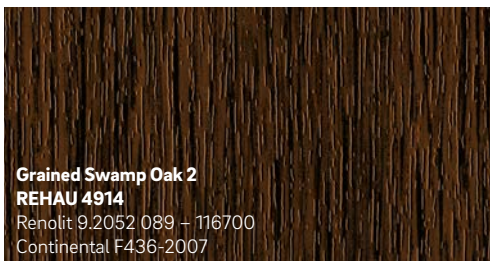

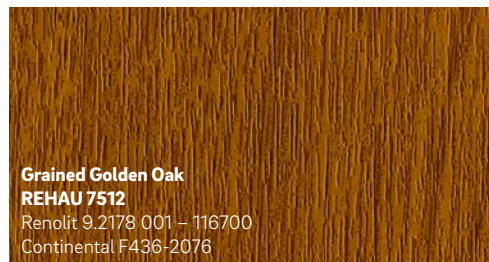

2 REHAU's foil laminate designs are pre-treated with adhesive and applied to the window profile with a special procedure that firmly and permanently bonds them to the profile.

Architectural freedom

With REHAU, you can do more than choose your own colour scheme; you can also take your pick from almost all of our design options.

The colours shown may differ from the original foil colours for printing reasons. In special cases, delivery times may differ due to the increased production costs.

* Only single-sided lamination is available as standard

** As of 01/01/2020 non-standard decorative design
